Re: HEDIS[®] Chlamydia Screening in Women (CHL)

Dear «First_Name» «Last_Name», «Title»:

This letter is a part of our continued efforts to ensure that you are knowledgeable of Jai Medical Systems Managed Care Organization, Inc.'s quality assurance standards as they relate to HEDIS[®] (Healthcare Effectiveness Data and Information Set). It is our hope that this information will assist you in achieving our quality assurance goals.

The **Chlamydia Screening in Women (CHL)** measure calculates the percentage of women 16 to 25 years of age who have had at least one test for Chlamydia during the calendar year. Sexually transmitted diseases are a prevalent concern with the Maryland Medicaid population. It is important that all sexually active women receive an annual Chlamydia test.

Attached you will find a criteria receipt. After reviewing the standards for this measure, please sign and fax this receipt to Stephanie Scharpf at (410) 433-4615.

We believe that the information provided will help you understand how HEDIS[®] will be used to interpret the quality of care provided to our members. Please remember that this information has been adapted from HEDIS[®] guidelines and should not be substituted for your sound medical judgment. Thank you for your continued efforts to ensure that our members receive the highest quality of care possible. Please feel free to contact us at (410) 433-2200 if you have any questions or concerns.

Sincerely,

Frances Bird, M.D.
Director, Quality Assurance

Sincerely,

Stephanie Scharpf
Director, Regulatory Compliance and
Administration
